Information for Authors

COPYRIGHT. Material that is published in the MARYLAND STATE MEDICAL JOURNAL is protected by copyright and may not be reproduced without the written permission of both the author and the JOURNAL.

MANUSCRIPTS. Manuscripts will be accepted for consideration with the understanding that they are original, have never before been published, and are contributed solely to the MARYLAND STATE MEDICAL JOURNAL. Address manuscripts to Editor, 1211 Cathedral St., Baltimore Maryland 21201.

Rejected manuscripts are returned by regular mail. Accepted manuscripts become the property of the JOURNAL and are not returned. The JOURNAL is not responsible for loss of manuscripts through circumstances that are beyond its control.

Specifications: Manuscripts must be original typed copy (not all capitals), not carbons, on firm typewriter paper, doublespaced throughout (including text, case reports, legends, tables, and references), with margins of at least 1½ inches. Subheads should be inserted at reasonable intervals to break the typographic monotony of lengthy texts. A carbon copy is to be retained by the author. The manuscript should include the title of the article (titles are best brief and concise), the full name of the author (or authors) with degrees, academic or professional titles, affiliations, complete addresses, and any institutional or other credits. Pages should be numbered consecutively. Uncommon and parochial or esoteric abbreviations if used must be explained and the generic as well as the trade names of pharmaceutical products given. Italics are rarely used.

Tables: Each table should be typed on a separate sheet of paper, be numbered consecutively, have a brief descriptive title, and its position in text indicated. Take care that columns add up correctly and that statistics are consistent in both tables and text.

Permissions: When material is reproduced from other sources, full credit must be given to both author and publisher and written permission from these sources included. Where work is reported from a governmental service or institution, clearance by requisite authority should accompany the manuscript.
